

TELESCOPIC BOOM EXTENDS PRODUCTIVITY

ON THE VERMEER ATX530 COMPACT ARTICULATED LOADER.

NON-EXTENDED

Concept shown

Dump height of 88.6 in (225 cm)

Telescopic boom benefits: Boom extension for more reach / Horizontal reach when needed / Minimal tail swing for tight spaces / Accurate and precise positioning

Vermeer compact articulated loaders offer great extendibility, and we're not just talking about their diverse jobsite application use. We mean quite literally the extensive reach provided by their telescopic booms. A telescopic boom extends straight out from the boom attached to the machine's chassis, enabling the operator to accomplish tasks quickly — tasks that would usually require more maneuvering.

EXTENDED

Concept shown

Boom extends 35.4 in (89.9 cm)

Dump height of 108.3 in (275.1 cm)
